Analytical Chemistry Cume

April 19, 2013

In analytical seminar you were requested to read a paper entitled:

Isobaric Tagging-Based Selection and Quantitation of Cerebrospinal Fluid Tryptic Peptides with Reporter Calibration Curves, Loı¨c Dayon, Natacha Turck, Stefan Kienle, Peter Schulz-Knappe, Denis F. Hochstrasser, Alexander Scherl, and Jean-Charles Sanchez, *Anal. Chem.* **2010,** *82,* 848–858

This cume is over that assignment:

Define the following abbreviations; and describe each, giving the principles upon which they work.
Each problem is worth 20 points.

1) orthogonal IEF OGE

2) ESI LTQ-OT

3) MS/MS

4) ID-MS

5) QQQ
