BIOCHEMISTRY CUMULATIVE EXAM

October 23, 1993

Literature Awareness

Recall an article that you have read recently from one of the following journals:

Biochemistry

Journal of Biological Chemistry

Biochimica et Biophysica Acta

European Journal of Biochemistry

Science or **Nature** (biochemistry article)

The article should have a 1992 or 1993 publication date.

Articles from the biochemistry literature club and articles authored by members of your research group are disqualified.

(10 pts) 1. Give the approximate title or subject of the article.

(10 pts) 2. Name one of the authors or the location where the work was done.

(20 pts) 3. State the research question(s) that the authors were trying to address.

(20 pts) 4. Summarize the experimental (or theoretical) approach(es) used to address the question(s).

(30 pts) 5. Evaluate the findings of the authors in light of the questions they were originally asking.

(10 pts) 6. What next? Speculate on what the authors might write in a follow-up publication.
