BIOCHEMISTRY CUMULATIVE EXAM

March 30, 1996

A copy of the table of contents of the latest issues of The Journal of Biological Chemistry and Biochemistry are attached.

Answer EITHER part A or part B

Part A.

If you have read one of the articles listed on the attached sheets:

(30) 1. What is the purpose and background for this particular article? What questions or hypotheses do the authors pose or propose to answer?

(30) 2. Give an overview of the main experiments. What did the authors do? What kind of data did they collect? You might want to discuss the tables, figures etc.

(40) 3. Critique the paper. Consider such factors as:

A) Do the data support the authors conclusions? Why or why not?
B) Are there any deficiencies in the work?
C) What additional experimentation or exploration would you suggest?
D) Any additional comments you wish to include.

Part B

If you have not read any of these articles on the attached sheets, select one title of interest to you and list it in your blue book. The only restriction is that the paper cannot be directly related to your research project.

(30) 1. What general or specific problems are being addressed by the scientific community in the general area suggested by the title of the paper?

(30) 2. What experimental approaches are being used to explore this problem? You might also want to discuss any limitations of the methods to produce definitive answers to the problem.

(40) 3. What advances have been made in this area in the last year or two? What do you think are some of the major unresolved issues?

Vol. 271, No. 11 March 15, 1996

CONTENTS Arranged by Subject Categories

CARBOHYDRATES, LIPIDS, AND OTHER NATURAL PRODUCTS

6062 **Lipoprotein association of human apolipoprotein E/A-I chimeras. Expression in transfected hepatoma cells.** *Beth L. Thurberg, Catherine A. Reardon, and Godfrey S. Getz*

6192 **Mechanism of action of cryptophycin. Interaction with the *Vinca* alkaloid domain of tubulin.** *Charles D. Smith and Xinqun Zhang*

6476 **Substrate specificity of the dolichol phosphate mannose: glucosaminyl phosphatidylinositol α1–4-mannosyltransferase of the glycosylphosphatidylinositol biosynthetic pathway of African trypanosomes.** *Terry K. Smith, Sylvain Cottaz, John S. Brimacombe, and Michael A. J. Ferguson*

CELL BIOLOGY AND METABOLISM

•5957 **Tyrosine phosphorylation and enhanced expression of paxillin during neuronal differentiation *in vitro*.** *Phillip S. Leventhal and Eva L. Feldman*

•5965 **Human native soluble CD40L is a biologically active trimer, processed inside microsomes.** *Fabienne Pietravalle, Sybille Lecoanet-Henchoz, Horst Blasey, Jean-Pierre Aubry, Greg Elson, Michael D. Edgerton, Jean-Yves Bonnefoy, and Jean-François Gauchat*

38 **A physical interaction between the cell death protein Fas and the tyrosine kinase $p59^{fynT}$.** *Eric A. Atkinson, Hanne Ostergaard, Kevin Kane, Michael J. Pinkoski, Antonio Caputo, Michael W. Olszowy, and R. Chris Bleackley*

•5976 **Peroxynitrite inhibits glutamate transporter subtypes.** *Davide Trotti, Daniela Rossi, Ola Gjesdal, Line M. Levy, Giorgio Racagni, Niels C. Danbolt, and Andrea Volterra*

•5980 **Insulin receptor substrate-2 binds to the insulin receptor through its phosphotyrosine-binding domain and through a newly identified domain comprising amino acids 591–786.** *Dominique Sawka-Verhelle, Sophie Tartare-Deckert, Morris F. White, and Emmanuel Van Obberghen*

6000 **Characterization of sulfur-centered radical intermediates formed during the oxidation of thiols and sulfite by peroxynitrite. ESR-spin trapping and oxygen uptake studies.** *Hakim Karoui, Neil Hogg, Claudine Fréjaville, Paul Tordo, and B. Kalyanaraman*

6010 **Inhibition of monocyte chemotaxis to C-C chemokines by antisense oligonucleotide for cytosolic phospholipase A_2.** *Massimo Locati, Giuseppe Lamorte, Walter Luini, Martino Introna, Sergio Bernasconi, Alberto Mantovani, and Silvano Sozzani*

6050 **Cyclin G1 and cyclin G2 comprise a new family of cyclins with contrasting tissue-specific and cell cycle-regulated expression.** *Mary C. Horne, Gay Lynn Goolsby, Karen L. Donaldson, David Tran, Michael Neubauer, and Alan F. Wahl*

6071 **Epidermal growth factor-related peptides activate distinct subsets of ErbB receptors and differ in their biological activities.** *Roger R. Beerli and Nancy E. Hynes*

6077 **The C-terminal region of carboxypeptidase E involved in membrane binding is distinct from the region involved with intracellular routing.** *Oleg Varlamov and Lloyd D. Fricker*

6092 ***trk*A mediates the nerve growth factor-induced intracellular calcium accumulation.** *Maria A. De Bernardi, Stuart J. Rabin, Anna M. Colangelo, Gary Brooker, and Italo Mocchetti*

6099 **Substitution of specific amino acids in insulin-like growth factor (IGF) binding protein 5 alters heparin binding and its change in affinity for IGF-I in response to heparin.** *Takami Arai, Jane Clarke, Alex Parker, Walker Busby, Jr., Taek Nam, and David R. Clemmons*

6122 **Ligand-toxin hybrids directed to the α_2-macroglobulin receptor/low density lipoprotein receptor-related protein exhibit lower toxicity than native *Pseudomonas* exotoxin.** *Alexey G. Zdanovsky, Marina V. Zdanovskaia, Dudley Strickland, and David J. FitzGerald*

6129 **Somatostatin inhibits PC Cl3 thyroid cell proliferation through the modulation of phosphotyrosine phosphatase activity. Impairment of the somatostatinergic effects by stable expression of E1A viral oncogene.** *Tullio Florio, Antonella Scorziello, Morena Fattore, Vito D'Alto, Salvatore Salzano, Guido Rossi, Maria Teresa Berlingieri, Alfredo Fusco, and Gennaro Schettini*

6144 **The chemistry and tumoricidal activity of nitric oxide/hydrogen peroxide and the implications to cell resistance/susceptibility.** *Robin Farias-Eisner, Gautam Chaudhuri, Ernesto Aeberhard, and Jon M. Fukuto*

6152 **Gα13 stimulates Na^+-H^+ exchange through distinct Cdc42-dependent and RhoA-dependent pathways.** *Rebecca Hooley, Chun-Yuan Yu, Marc Symons, and Diane L. Barber*

6159 **Interactions of Cbl with two adaptor proteins, Grb2 and Crk, upon T cell activation.** *László Buday, Asim Khwaja, Szabolcs Sipeki, Anna Faragó, and Julian Downward*

6172 **Molecular mechanisms involved in muscarinic acetylcholine receptor-mediated G protein activation studied by insertion mutagenesis.** *Jie Liu, Nathalie Blin, Bruce R. Conklin, and Jürgen Wess*

6179 **Tyrosine kinase activity modulates catalysis and translocation of cellular 5-lipoxygenase.** *Robert A. Lepley, Danny T. Muskardin, and Frank A. Fitzpatrick*

6217 **Negative interaction between the RelA(p65) subunit of NF-κB and the progesterone receptor.** *Eric Kalkhoveng, Sacha Wissink, Paul T. van der Saag, and Bart van der Burg*

6245 **Keratinocyte growth factor inhibits cross-linked envelope formation and nucleosomal fragmentation in cultured human keratinocytes.** *Michelle D. Hines and B. Lynn Allen-Hoffmann*

6265 **Phosphoinositide 3-kinase γ and p85/phosphoinositide 3-kinase in platelets. Relative activation by thrombin receptor or β-phorbol myristate acetate and roles in promoting the ligand-binding function of $\alpha_{IIb}\beta_3$ integrin.** *Jun Zhang, Jin Zhang, Sanford J. Shattil, Michael C. Cunningham, and Susan E. Rittenhouse*

6283 **Two functional thioredoxins containing redox-sensitive vicinal dithiols from the *Chlamydomonas* outer dynein arm.** *Ramila S. Patel-King, Sharon E. Benashski, Alistair Harrison, and Stephen M. King*

6298 **Developmental expression of a tandemly repeated, proline- and glutamine-rich amino acid motif on hyphal surfaces of *Candida albicans*.** *Janet F. Staab, Christopher A. Ferrer, and Paula Sundstrom*

6306 **Bcl-x_S antagonizes the protective effects of Bcl-x_L.** *Andy J. Minn, Lawrence H. Boise, and Craig B. Thompson*

6328 **SOS phosphorylation and disassociation of the Grb2-SOS complex by the ERK and JNK signaling pathways.** *Dong Chen, Steven B. Waters, Kathleen H. Holt, and Jeffrey E. Pessin*

•Indicates a Communication

The JBC is available on World Wide Web. URL: *http://www-jbc.stanford.edu/jbc/*

Full *Instructions to Authors* will be found in (1996) *J. Biol. Chem.* **271**, 1–4, and reprints may be obtained from the editorial office.

6333 **Physical and functional interaction of Nef with Lck. HIV-1 Nef-induced T-cell signaling defects.** *Y. Collette, H. Dutartre, A. Benziane, F. Ramos-Morales, R. Benarous, M. Harris, and D. Olive*

6349 **Molecular cloning and expression of a modulatory subunit of the cyclic nucleotide-gated cation channel.** *Martin Biel, Xiangang Zong, Andreas Ludwig, Andrea Sautter, and Franz Hofmann*

6356 **Expression and function of ryanodine receptors in nonexcitable cells.** *Deborah L. Bennett, Timothy R. Cheek, Michael J. Berridge, Humbert De Smedt, Jan B. Parys, Ludwig Missiaen, and Martin D. Bootman*

6374 **Phosphorylation of the respiratory burst oxidase subunit p47^{phox} as determined by two-dimensional phosphopeptide mapping. Phosphorylation by protein kinase C, protein kinase A, and a mitogen-activated protein kinase.** *Jamel El Benna, La Rosa P. Faust, Jennifer L. Johnson, and Bernard M. Babior*

6389 **Physical and functional interactions between Lyn and p34^{cdc2} kinases in irradiated human B-cell precursors.** *Fatih M. Uckun, Lisa Tuel-Ahlgren, Kevin G. Waddick, Xiao Jun, Jizhong Jin, Dorothea E. Myers, R. Bruce Rowley, Anne L. Burkhardt, and Joseph B. Bolen*

6398 **Specificity of coupling of muscarinic receptor isoforms to a novel chick inward-rectifying acetylcholine-sensitive K^+ channel.** *Albert P. Gadbut, Daniela Riccardi, Leeying Wu, Steven C. Hebert, and Jonas B. Galper*

6411 **Regulation of lysyl oxidase by basic fibroblast growth factor in osteoblastic MC3T3-E1 cells.** *Eduardo J. Feres-Filho, Gabriel B. Menassa, and Phillip C. Trackman*

6417 **Identification of a major protein kinase C-binding protein and substrate in rat embryo fibroblasts. Decreased expression in transformed cells.** *Christine Chapline, Betty Mousseau, Katrina Ramsay, Steven Duddy, Yin Li, Susan C. Kiley, and Susan Jaken*

6423 **Reinitiation of protein translocation across the endoplasmic reticulum membrane for the topogenesis of multispanning membrane proteins.** *Tomoko Kuroiwa, Masao Sakaguchi, Tsuneo Omura, and Katsuyoshi Mihara*

6441 **Acidification of serotonin-containing secretory vesicles induced by a plasma membrane calcium receptor.** *Hadassah Tamir, Kuo-peing Liu, Mella Adlersberg, Shu-chi Hsiung, and Michael D. Gershon*

6451 **A consensus cAMP-dependent protein kinase (PK-A) site in place of the CcN motif casein kinase II site of simian virus 40 large T-antigen confers PK-A-mediated regulation of nuclear import.** *Chong-Yun Xiao, Stefan Hübner, Rachel M. Elliot, Adriana Caon, and David A. Jans*

6458 **Reconstitution of B cell antigen receptor-induced signaling events in a nonlymphoid cell line by expressing the Syk protein-tyrosine kinase.** *James D. Richards, Michael R. Gold, Sharon L. Hourihane, Anthony L. DeFranco, and Linda Matsuuchi*

6483 **Specific interaction of topoisomerase IIβ and the CD3ϵ chain of the T cell receptor complex.** *Hiroyasu Nakano, Tetsuo Yamazaki, Shoichiro Miyatake, Naoto Nozaki, Akihiko Kikuchi, and Takashi Saito*

6497 **The mitogen-activated protein kinase phosphatases PAC1, MKP-1, and MKP-2 have unique substrate specificities and reduced activity *in vivo* toward the ERK2 *sevenmaker* mutation.** *Yanfang Chu, Patricia A. Solski, Roya Khosravi-Far, Channing J. Der, and Kathleen Kelly*

6523 **Cellular internalization and degradation of antithrombin III-thrombin, heparin cofactor II-thrombin, and α_1-antitrypsin-trypsin complexes is mediated by the low density lipoprotein receptor-related protein.** *Maria Z. Kounnas, Frank C. Church, W. Scott Argraves, and Dudley K. Strickland*

6545 **Phosphorylation of the transit sequence of chloroplast precursor proteins.** *Karin Waegemann and Jürgen Soll*

6562 **Retinoid X receptor acts as a hormone receptor *in vivo* to induce a key metabolic enzyme for 1,25-dihydroxy-vitamin D_3. Vol. 270 (1995) 23906–23909.** *Elizabeth A. Allegretto, Nirupama Shevde, Aihua Zou, Stanley R. Howell, Marcus F. Boehm, Bruce W. Hollis, and J. Wesley Pike*

ENZYMOLOGY

6045 **Substrate specificity of glycinamide ribonucleotide transformylase from chicken liver.** *Vincent D. Antle, Dashan Liu, B. Robert McKellar, Carol A. Caperelli, Mei Hua, and Robert Vince*

6206 **Molecular cloning and sequencing of the cytostatic G protein-activated protein kinase PAK I.** *Rolf Jakobi, Charng-Jui Chen, Polygena T. Tuazon, and Jolinda A. Traugh*

6252 **Photolyase of *Myxococcus xanthus*, a Gram-negative eubacterium, is more similar to photolyases found in archaea and "higher" eukaryotes than to photolyases of other eubacteria.** *Kathleen A. O'Connor, Mark J. McBride, Melissa West, Halden Yu, Linh Trinh, Kevin Yuan, Tim Lee, and David R. Zusman*

6292 **Amino acid conservation in animal glucokinases. Identification of residues implicated in the interaction with the regulatory protein.** *Maria Veiga-da-Cunha, Stephane Courtois, Alain Michel, Eric Gosselain, and Emile Van Schaftingen*

6313 **Effects of conserved residues on the regulation of rabbit muscle pyruvate kinase.** *Xiaodong Cheng, Robert H. E. Friesen, and J. Ching Lee*

6367 ***In vitro* activity of hepatitis C virus protease NS3 purified from recombinant baculovirus-infected Sf9 cells.** *Christian Steinkühler, Licia Tomei, and Raffaele De Francesco*

6403 **Characterization of the G protein-coupled receptor kinase GRK4. Identification of four splice variants.** *Richard T. Premont, Alexander D. Maorae, Robert H. Stoffel, Namjin Chung, Julie A. Pitcher, Christine Ambrose, James Inglese, Marcy E. MacDonald, and Robert J. Lefkowitz*

6490 **Efficient expression of the gene for spinach phosphoribulokinase in *Pichia pastoris* and utilization of the recombinant enzyme to explore the role of regulatory cysteinyl residues by site-directed mutagenesis.** *Hillel K. Brandes, Fred C. Hartman, Tse-Yuan S. Lu, and Frank W. Larimer*

MEMBRANES AND BIOENERGETICS

•5972 **Cloned and expressed rat Ca^{2+}-sensing receptor. Differential cooperative responses to calcium and magnesium.** *Martial Rua, Adele M. Snowman, Lynda D. Hester, and Solomon H. Snyder*

6033 **4-hydroxyhexenal is a potent inducer of the mitochondrial permeability transition.** *Bruce S. Kristal, Brian K. Park, and Byung P. Yu*

6114 **Regulation by spermine of native inward rectifier K^+ channels in RBL-1 cells.** *Laura Bianchi, Mary-Louise Roy, Maurizio Taglialatela, David W. Lundgren, Arthur M. Brown, and Eckhard Ficker*

6164 **Ubiquinol-cytochrome *c* oxidoreductase. The redox reactions of the bis-heme cytochrome *b* in ubiquinone-sufficient and ubiquinone-deficient systems.** *Akemi Matsuno-Yagi and Youssef Hatefi*

6199 **Photoactivated azido fatty acid irreversibly inhibits anion and proton transport through the mitochondrial uncoupling protein.** *Petr Ježek, Jan Hanuš, Craig Semrad, and Keith D. Garlid*

6225 **N-terminal mutants of chloroplast cytochrome *f*. Effect on redox reactions and growth in *Chlamydomonas reinhardtii*.** *Jianhui Zhou, Javier G. Fernández-Velasco, and Richard Malkin*

6509 **The yeast cadmium factor protein (YCF1) is a vacuolar glutathione *S*-conjugate pump.** *Ze-Sheng Li, Mark Szczypka, Yu-Ping Lu, Dennis J. Thiele, and Philip A. Rea*

The Journal of Biological Chemistry (ISSN 0021-9258) is published weekly by the American Society for Biochemistry and Molecular Biology, Inc., 9650 Rockville Pike, Bethesda, MD 20814. Volume 271 for 1996: Institutions: United States, $1,150; Foreign, $1,340. Students/Postdoctoral Fellows: United States, $165; Foreign, $355. Single copies of the Journal are $26. CD-ROM (available *only* with printed subscription): United States, $75; Foreign, $80. (Note: Maryland and Canada add applicable taxes, unless a tax-exempt certificate number is shown.) The GST number for Canadian subscribers is 130370018. Second class postage paid at Bethesda, MD 20814, U.S.A. and at additional mailing offices. Printed in the U.S.A. POSTMASTER: Send address changes to THE JOURNAL OF BIOLOGICAL CHEMISTRY at P.O. Box 830399, Birmingham, AL 35283-0399, U.S.A.

6518 **Acylation targets endothelial nitric-oxide synthase to plasmalemmal caveolae.** *Philip W. Shaul, Eric J. Smart, Lisa J. Robinson, Zohre German, Ivan S. Yuhanna, Yunshu Ying, Richard G. W. Anderson, and Thomas Michel*

NUCLEIC ACIDS, PROTEIN SYNTHESIS, AND MOLECULAR GENETICS

•5953 **Structure and function of a novel voltage-gated, tetrodotoxin-resistant sodium channel specific to sensory neurons.** *Lakshmi Sangameswaran, Stephen G. Delgado, Linda M. Fish, Bruce D. Koch, Lyn B. Jakeman, Gregory R. Stewart, Ping Sze, John C. Hunter, Richard M. Eglen, and Ronald C. Herman*

•5961 **Dominant negative Stat3 mutant inhibits interleukin-6-induced Jak-STAT signal transduction.** *Allard Kaptein, Valérie Paillard, and Michael Saunders*

5988 **Positive regulation of *cdc2* gene activity by protein phosphatase type 2A.** *Virna L. Jaramillo-Babb, Jeffrey L. Sugarman, Robert Scavetta, Shiow-Jen Wang, Norbert Berndt, Teresa L. Born, Christopher K. Glass, and Axel H. Schönthal*

5993 ***Drosophila* RNA polymerase II mutants that affect transcription elongation.** *Yan Chen, David Chafin, David H. Price, and Arno L. Greenleaf*

6039 **In murine 3T3 fibroblasts, different second messenger pathways resulting in the induction of NO synthase II (iNOS) converge in the activation of transcription factor NF-κB.** *Hartmut Kleinert, Christian Euchenhofer, Irmgard Ihrig-Biedert, and Ulrich Förstermann*

6084 **Phosphorylation of p105 PEST sequences via a redox-insensitive pathway up-regulates processing to p50 NF-κB.** *Mary Lee MacKichan, Frédérique Logeat, and Alain Israël*

6107 **Purification and characterization of human cleavage factor I_m involved in the 3′ end processing of messenger RNA precursors.** *Ursula Rüegsegger, Katrin Beyer, and Walter Keller*

6185 **Different conformations and site selectivity of HO_2^--Co(III)-bleomycin A_2 and Co(III)-bleomycin A_2 bound to DNA oligomers.** *Qunkai Mao, Patricia Fulmer, Wenbao Li, Eugene F. DeRose, and David H. Petering*

6260 **Identification and characterization of a second retinoic acid response element in the phosphoenolpyruvate carboxykinase gene promoter.** *Donald K. Scott, John A. Mitchell, and Daryl K. Granner*

6273 **Nuclear factor I as a potential regulator during post-embryonic organ development.** *Monika Puzianowska-Kuznicka and Yun-Bo Shi*

6379 **Two androgen response regions cooperate in steroid hormone regulated activity of the prostate-specific antigen promoter.** *Kitty B. J. M. Cleutjens, Conny C. E. M. van Eekelen, Hetty A. G. M. van der Korput, Albert O. Brinkmann, and Jan Trapman*

6467 **Activity of the distal positive element of the peripherin gene is dependent on proteins binding to an Ets-like recognition site and a novel inverted repeat site.** *Lufen Chang and Mary Ann Thompson*

6502 **Retinoic acid down-regulation of fibronectin and retinoic acid receptor α proteins in NIH-3T3 cells. Block of this response by *ras* transformation.** *Giorgio Scita, Nadine Darwiche, Eileen Greenwald, Miriam Rosenberg, Katerina Politi, and Luigi M. De Luca*

6530 ***In vitro* reconstitution and characterization of the *Rhodobacter capsulatus* NtrB and NtrC two-component system.** *Paul J. Cullen, William C. Bowman, and Robert G. Kranz*

6537 **Cloning and characterization of the *Neurospora crassa cyt-5* gene. A nuclear-coded mitochondrial RNA polymerase with a polyglutamine repeat.** *Bing Chen, Anne R. Kubelik, Sabine Mohr, and Caroline A. Breitenberger*

6555 **Enhancement of oxidative cleavage of DNA by the binding sites of two anti-double-stranded DNA antibodies.** *Tetsuo Kubota, Naomi Watanabe, Yoshiyuki Kanai, and B. David Stollar*

PROTEIN CHEMISTRY AND STRUCTURE

•5984 **Contrasting *in vivo* effects of murine and human apolipoprotein A-II. Role of monomer *versus* dimer.** *Elaine L. Gong, Lori J. Stoltzfus, Catherine M. Brion, Deepa Murugesh, and Edward M. Rubin*

6017 **The cytoplasmic domain of $\alpha_{IIb}\beta_3$. A ternary complex of the integrin α and β subunits and a divalent cation.** *Thomas A. Haas and Edward F. Plow*

6027 **Model for the factor VIIIa-dependent decay of the intrinsic factor Xase. Role of subunit dissociation and factor IXa-catalyzed proteolysis.** *Philip J. Fay, Tammy L. Beattie, Lisa M. Regan, Lynn M. O'Brien, and Randal J. Kaufman*

6137 **Real time kinetics of the DnaK/DnaJ/GrpE molecular chaperone machine action.** *Bogdan Banecki and Maciej Zylicz*

6212 **Evidence for the existence of both proteasomes and a novel high molecular weight peptidase in *Entamoeba histolytica*.** *Henning Scholze, Silja Frey, Zdenka Cejka, and Tilly Bakker-Grunwald*

6233 **Mutagenic analysis of platelet thromboxane receptor cysteines. Roles in ligand binding and receptor-effector coupling.** *Drew D. D'Angelo, Jeremy J. Eubank, Michael G. Davis, and Gerald W. Dorn II*

6241 **A nascent secretory protein may traverse the ribosome/endoplasmic reticulum translocase complex as an extended chain.** *Paul Whitley, IngMarie Nilsson, and Gunnar von Heijne*

6322 **The unique nature of the serine interactions for α_1-adrenergic receptor agonist binding and activation.** *John Hwa and Dianne M. Perez*

GENERAL INFORMATION

This publication is available on CD-ROM. Inquire about availability through your subscription agent or contact: THE JOURNAL OF BIOLOGICAL CHEMISTRY, P.O. BOX 830399, BIRMINGHAM, AL 35283-0399, U.S.A. Minireviews are reprinted in January of the succeeding year in a Minireview Compendium. Compendia for 1988 through 1995 are available through the ASBMB office: ASBMB Office, 9650 Rockville Pike, Bethesda, MD 20814, U.S.A.

Submit *all* manuscripts in triplicate to

Editor, The Journal of Biological Chemistry
9650 Rockville Pike
Bethesda, MD 20814, U.S.A.

Accepted manuscripts will be published with the implicit understanding that the author(s) will pay a charge per page. Current page charges may be obtained by contacting the JBC office. Under exceptional circumstances, when no source of grant or other support exists, the author(s) may apply, **at the time of submission,** for a grant-in-aid to Chairman, Publications Committee, American Society for Biochemistry and Molecular Biology, Inc., 9650 Rockville Pike, Bethesda, MD 20814. All such applications must be countersigned by an appropriate institutional official stating that no funds are available for page charges.

Queries on matters of general editorial policy, requests for reprints of the "Instructions to Authors," or of the "Editorial Policy and Practices," or for permission to reproduce any part of a previously published article should be directed to the Journal Editorial Office in Bethesda, telephone 301-530-7150; fax 301-571-1824.

The Journal of Biological Chemistry publishes papers on a broad range of topics of interest to biochemists. The views expressed are those of the author(s) and not of *The Journal of Biological Chemistry* or the American Society for Biochemistry and Molecular Biology.

The Journal of Biological Chemistry is copyrighted by the American Society for Biochemistry and Molecular Biology, Inc. Reprographic copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law is allowed, provided that the $2.50 per-copy fee is paid through the Copyright Clearance Center, 222 Rosewood Drive, Danvers, MA 01923. For those organizations that have been granted photocopy license by CCC, a separate system of payment has been arranged. The fee code for users of the Transactional Reporting Service is: 0021-9258/96/$2.50. ∞ Printed on acid-free paper effective with Volume 254, Issue No. 1 (1979). Reproduction of any portion of an article for subsequent republication requires permission of the copyright owner. Requests should be made in writing to the American Society for Biochemistry and Molecular Biology, Inc., Attn.: Editorial Office, 9650 Rockville Pike, Bethesda, MD 20814, and should include a statement of intended use as well as explicit specifications of the material to be reproduced.

Address all correspondence and orders relative to subscriptions and back copies to: *The Journal of Biological Chemistry,* P.O. Box 830399, Birmingham, AL 35283-0399, U.S.A., telephone 800-633-4931. Subscriptions are entered on a calendar year basis only. Allow at least six weeks for address changes. Claims for replacement copies must be received within three months of the issue date.

NEW CONCEPTS IN BIOCHEMISTRY

3351 From Poor Substrates to Good Inhibitors: Design of Inhibitors for Serine and Thiol Proteases
*Ricky Baggio, Yi-Qun Shi, Yong-qian Wu, and Robert H. Abeles**

ACCELERATED PUBLICATIONS

3354 Temperature Dependence of the Reorganization Energy for Charge Recombination in the Reaction Center from *Rhodobacter sphaeroides*
*J. M. Ortega, P. Mathis, J. C. Williams, and J. P. Allen**

3362 Molecular Cloning and Functional Expression of a New Human CC-Chemokine Receptor Gene
*Michel Samson, Olivier Labbe, Catherine Mollereau, Gilbert Vassart, and Marc Parmentier**

ARTICLES

3368 Cardiotoxin II Segregates Phosphatidylglycerol from Mixtures with Phosphatidylcholine: ^{31}P and ^{2}H NMR Spectroscopic Evidence
*Mary Anna Carbone and Peter M. Macdonald**

3379 Enforced Interaction of One Molecule of Plastocyanin with Two Molecules of Cytochrome *c* and an Electron-Transfer Reaction Involving the Hydrophobic Patch on the Plastocyanin Surface
*Ling Qin and Nenad M. Kostić**

3387 Water-Soluble, Recombinant Cu_A-Domain of the Cytochrome ba_3 Subunit II from *Thermus thermophilus*
*Claire E. Slutter, Donita Sanders, Pernilla Wittung, Bo G. Malmström, Roland Aasa, John H. Richards, Harry B. Gray, and James A. Fee**

3396 Mechanism of Lipoxygenase Inactivation by the Linoleic Acid Analogue Octadeca-9,12-diynoic Acid
Maria J. Schilstra, Willem F. Nieuwenhuizen, Gerrit A. Veldink, and Johannes F. G. Vliegenthart*

3402 High-Resolution Solution Structure of the EGF-like Domain of Heregulin-α
■ *Neil E. Jacobsen, Nasrin Abadi, Mark X. Sliwkowski, Dorothea Reilly, Nicholas J. Skelton, and Wayne J. Fairbrother**

3418 Positive and Negative Cooperativities at Subsequent Steps of Oxygenation Regulate the Allosteric Behavior of Multistate Sebacylhemoglobin
Enrico Bucci, Anna Razynska, Herman Kwansa, Zygmunt Gryczynski, John H. Collins, Clara Fronticelli, Ron Unger, Michael Braxenthaler, John Moult, Xinhua Ji, and Gary Gilliland*

3426 Standard Free Energies for Uridylyl Group Transfer by Hexose-1-P Uridylyltransferase and UDP-Hexose Synthase and for the Hydrolysis of Uridine 5′-Phosphoimidazolate
*A. Arabshahi, F. J. Ruzicka, S. Geeganage, and P. A. Frey**

3429 Structural and Electronic Properties of the Heme Cofactors in a Multi-Heme Synthetic Cytochrome
*William A. Kalsbeck, Dan E. Robertson, Ravindra K. Pandey, Kevin M. Smith, P. Leslie Dutton, and David F. Bocian**

3439 Reversal of the Hydrogen Bond to Zinc Ligand Histidine-119 Dramatically Diminishes Catalysis and Enhances Metal Equilibration Kinetics in Carbonic Anhydrase II
Chih-chin Huang, Charles A. Lesburg, Laura L. Kiefer, Carol A. Fierke, and David W. Christianson**

3447 Biosynthesis of Methanopterin
*Robert H. White**

3457 Inhibition of Human Steroid 5α Reductases type I and II by 6-Aza-Steroids: Structural Determinants of One-Step vs Two-Step Mechanism
Marcia L. Moss, Petr Kuzmič, J. Darren Stuart, Gaochao Tian, Anne G. Peranteau, Stephen V. Frye, Sue H. Kadwell, Thomas A. Kost, Laurie K. Overton, and Indravadan R. Patel*

3465 Folding and Functional Complementation of Engineered Fragments from Yeast Phosphoglycerate Kinase
*Frédéric Pecorari, Christophe Guilbert, Philippe Minard, Michel Desmadril, and Jeannine M. Yon**

3477 Presence of a Slow Dimerization Equilibrium on the Thermal Unfolding of the 205−316 Thermolysin Fragment at Neutral pH
Francisco Conejero-Lara and Pedro L. Mateo**

3487 Probing Heme Protein Conformational Equilibration Rates with Kinetic Selection
Wei Dong Tian, J. Timothy Sage, Paul M. Champion, Ellen Chien, and Stephen G. Sligar*

3503 Importance of Highly Conserved Anionic Residues and Electrostatic Interactions in the Activity and Structure of the Cardiotonic Polypeptide Anthopleurin B
*Paramjit K. Khera and Kenneth M. Blumenthal**

3508 Spectroscopic Characterization of a High-Affinity Calmodulin−Target Peptide Hybrid Molecule
Stephen R. Martin, Peter M. Bayley, Susan E. Brown, Tudor Porumb, Mingjie Zhang, and Mitsuhiko Ikura*

3518 Purification and Properties of a Ca^{2+}-Independent Barbed-End Actin Filament Capping Protein, CapZ, from Human Polymorphonuclear Leukocytes
*Noel A. Maun, David W. Speicher, Mark J. DiNubile, and Frederick S. Southwick**

3525 Sequence-Specific Actinomycin D Binding to Single-Stranded DNA Inhibits HIV Reverse Transcriptase and Other Polymerases
Randolph L. Rill and Karl H. Hecker*

3534 ■ Sequence Dependence and Direct Measurement of Crossover Isomer Distribution in Model Holliday Junctions using NMR spectroscopy
*Göran Carlström and Walter J. Chazin**

3545 Origins of Binding Specificity of the A1 Heterogeneous Nuclear Ribonucleoprotein
*Norzehan Abdul-Manan, Shawn M. O'Malley, and Kenneth R. Williams**

3555 ■ Improved Nearest-Neighbor Parameters for Predicting DNA Duplex Stability
John SantaLucia, Jr., Hatim T. Allawi, and P. Ananda Seneviratne*

3563 Differential Proximity Probing of Two DNA Binding Sites in the *Escherichia coli* RecA Protein Using Photo-Cross-Linking Methods
Yi Wang and Kenji Adzuma*

3572 Human DNA Polymerase ε: Enzymologic Mechanism and Gap-Filling Synthesis
*Dmitry Ju. Mozzherin and Paul A. Fisher**

3578 Dynamic O-GlcNAcylation of the Small Heat Shock Protein αB-Crystallin
*Elizabeth P. Roquemore, Marc R. Chevrier, Robert J. Cotter, and Gerald W. Hart**

3587 Characterization of a Soluble Adrenal Phosphatidylinositol 4-Kinase Reveals Wortmannin Sensitivity of Type III Phosphatidylinositol Kinases
*Gregory J. Downing, Stanley Kim, Satoshi Nakanishi, Kevin J. Catt, and Tamas Balla**

3595 Kinetics and Mechanism of the Hydrolysis of Depsipeptides Catalyzed by the β-Lactamase of *Enterobacter cloacae* P99
*Yang Xu, Gabriel Soto, Kenneth R. Hirsch, and R. F. Pratt**

3604 β-Secondary and Solvent Deuterium Kinetic Isotope Effects on β-Lactamase Catalysis
*S. A. Adediran, S. A. Deraniyagala, Yang Xu, and R. F. Pratt**

3614 Cryptic Initiation at the Human D4 Receptor Reveals a Functional Role for the Amino Terminus
*Oscar Schoots, Suparna Sanyal, Hong-Chang Guan, Vera Jovanovic, and Hubert H. M. Van Tol**

3619 Specificity of *C*-Glycoside Complexation by Mannose/Glucose Specific Lectins
Ross V. Weatherman, Kathleen H. Mortell, Mary Chervenak, Laura L. Kiessling, and Eric J. Toone**

3625 Mutagenesis of Transmembrane Domain 11 of P-Glycoprotein by Alanine Scanning
*Maya Hanna, Martine Brault, Tony Kwan, Christina Kast, and Philippe Gros**

3636 Peptidyl–Prolyl *Cis–Trans* Isomerase of *Bacillus subtilis*: Identification of Residues Involved in Cyclosporin A Affinity and Catalytic Efficiency
*Sven F. Göthel, Michael Herrler, and Mohamed A. Marahiel**

641 Conformation of the Acylation Site of Palmitoylgramicidin in Lipid Bilayers of Dimyristoylphosphatidylcholine
Roger E. Koeppe, II, T. C. Bas Vogt, Denise V. Greathouse, J. Antoinette Killian, and Ben de Kruijff*

■ Supporting information for this paper is available separately (consult a current masthead page for ordering information). Supporting information is available to subscribers electronically via the Internet at http://pubs.acs.org (WWW) and pubs.acs.org (Gopher) and on the CD-ROM edition of the journal. All supporting information except for structure factor tables will also appear following the paper in the microfilm edition of the journal.

* In papers with more than one author, the asterisk indicates the name of the author to whom inquiries about the paper should be addressed.

Author Index

Aasa, R., 3387
Abadi, N., 3402
Abdul-Manan, N., 3545
Abeles, R. H., 3351
Adediran, S. A., 3604
Adzuma, K., 3563
Allawi, H. T., 3555
n, J. P., 3354
oshahi, A., 3426

Baggio, R., 3351
Balla, T., 3587
Bayley, P. M., 3508
Blumenthal, K. M., 3503
Bocian, D. F., 3429
Brault, M., 3625
Braxenthaler, M., 3418
Brown, S. E., 3508
Bucci, E., 3418

Carbone, M. A., 3368
Carlström, G., 3534
Catt, K. J., 3587
Champion, P. M., 3487
Chazin, W. J., 3534
Chervenak, M., 3619
Chevrier, M. R., 3578
Chien, E., 3487
Christianson, D. W., 3439
Collins, J. H., 3418
Conejero-Lara, F., 3477
Cotter, R. J., 3578

de Kruijff, B., 3641
Deraniyagala, S. A., 3604
Desmadril, M., 3465
DiNubile, M. J., 3518
Downing, G. J., 3587
Dutton, P. L., 3429

Fairbrother, W. J., 3402
Fee, J. A., 3387
