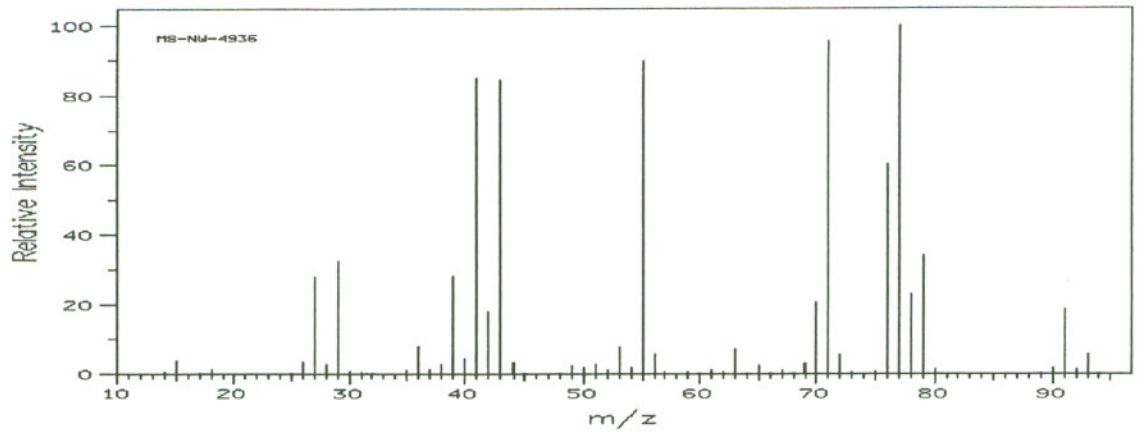
MARCH 7, 2003

Organic Cume – Solve the structures for the following spectra. Indicate your reasoning.

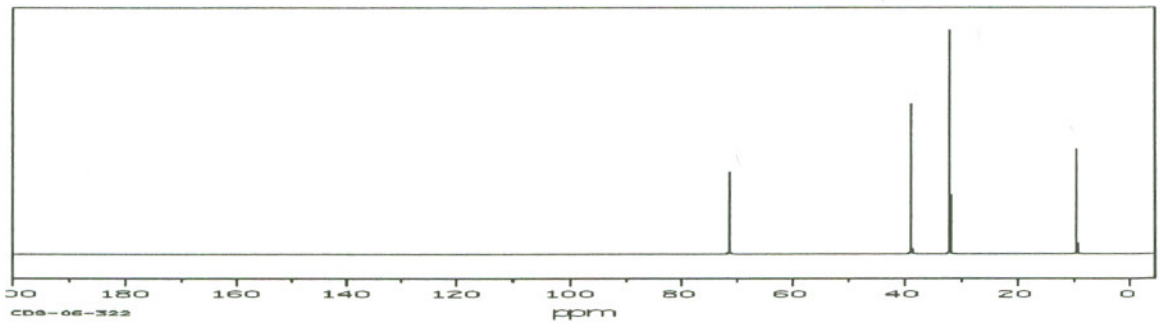
Problem 1:

Mass Spectrum:

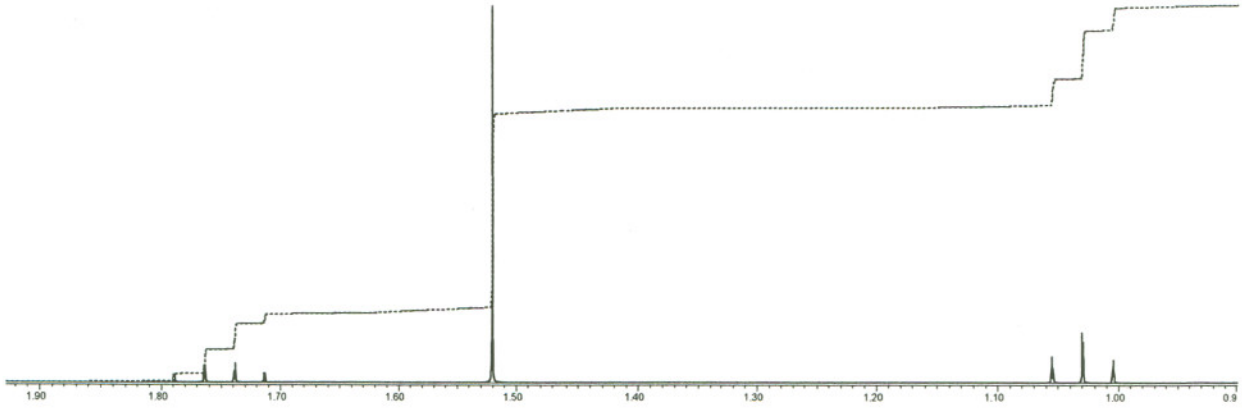
ıote: $M^{+\cdot}$ 106/108) less than 1%



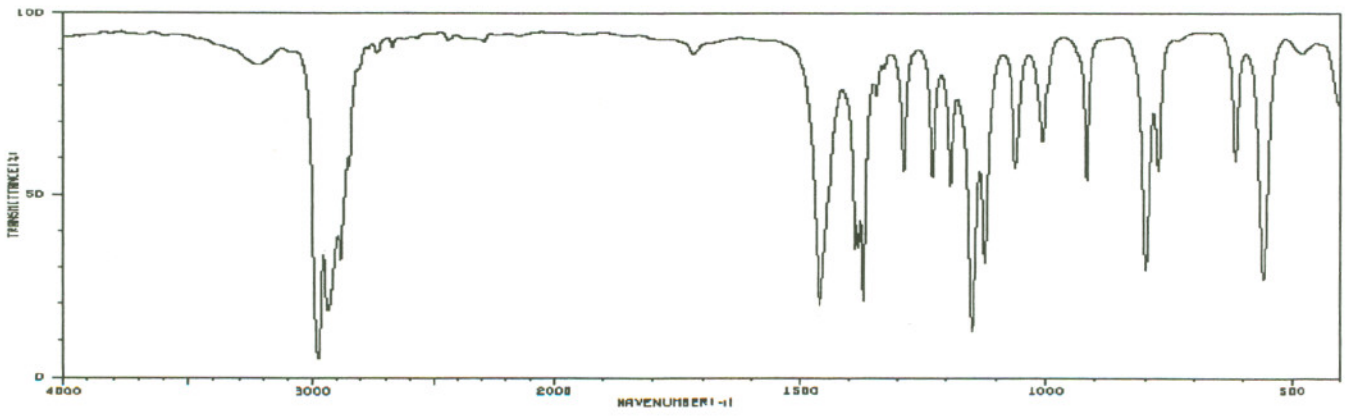
^{13}C NMR: 25.16 MHz



^{1}H NMR 300MHz: Integration of multiplets, downfield to upfield, 2:6:3



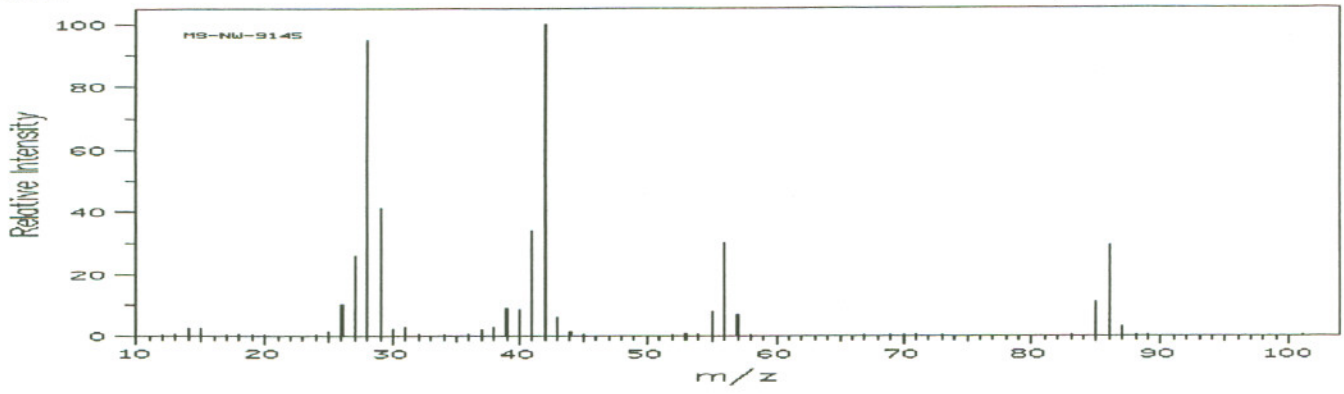
IR: (liquid film)



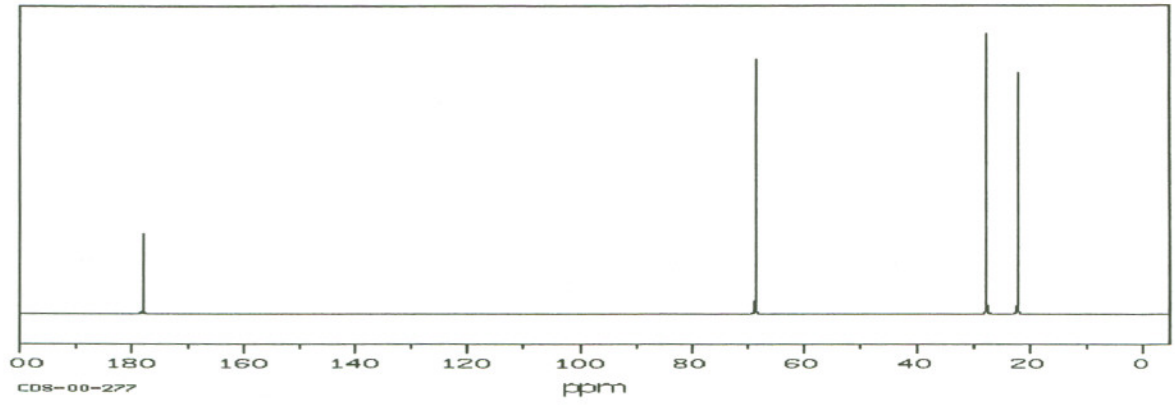
Note: No significant absorption above 210nm in the UV

Problem 2

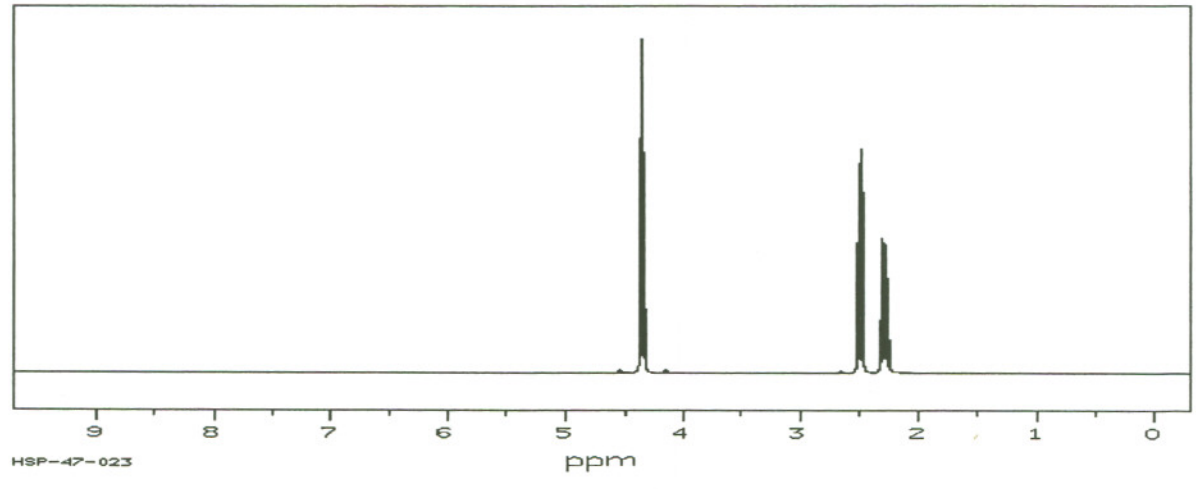
MS:



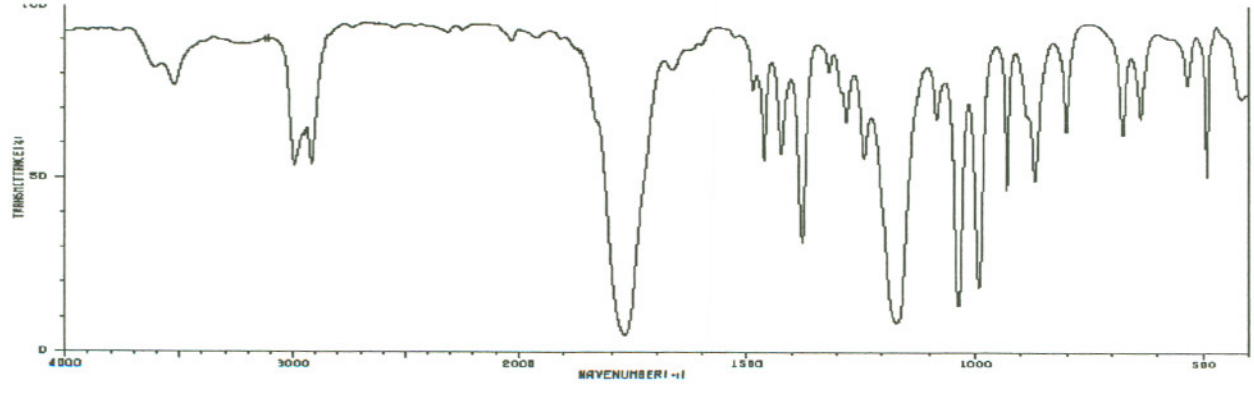
^{13}C NMR:
25.16 MHz



^{1}H NMR,
400MHz:
integration
of multiplets
(downfield to
upfield)
1:1:1



IR:
liquid film



Note: No significant absorption above 210nm in the UV
