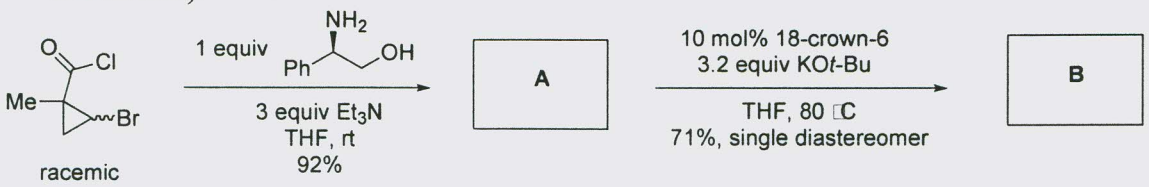
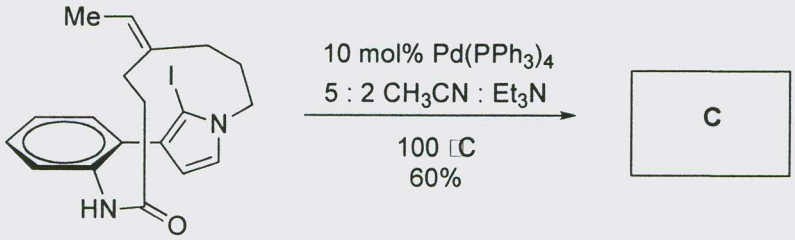
# Organic Cume
# 10-29-10

1. How many diastereomers does **A** have? Draw all the possible diastereomers of **A**. Draw the structure of product **B** with its **STEREOCHEMISTRY**. Provide a mechanism for the transformation of **A** to **B**. Your mechanism should account for the formation of only **SINGLE** diastereomer for **B** (*J. Am. Chem. Soc.* ***2009****, 131, 6906-6907*).





2. Draw the structure of **C** (*Org. Lett.* ***2010****, 12, 4224-4227*). This is a **NAME** reaction. What is it?
