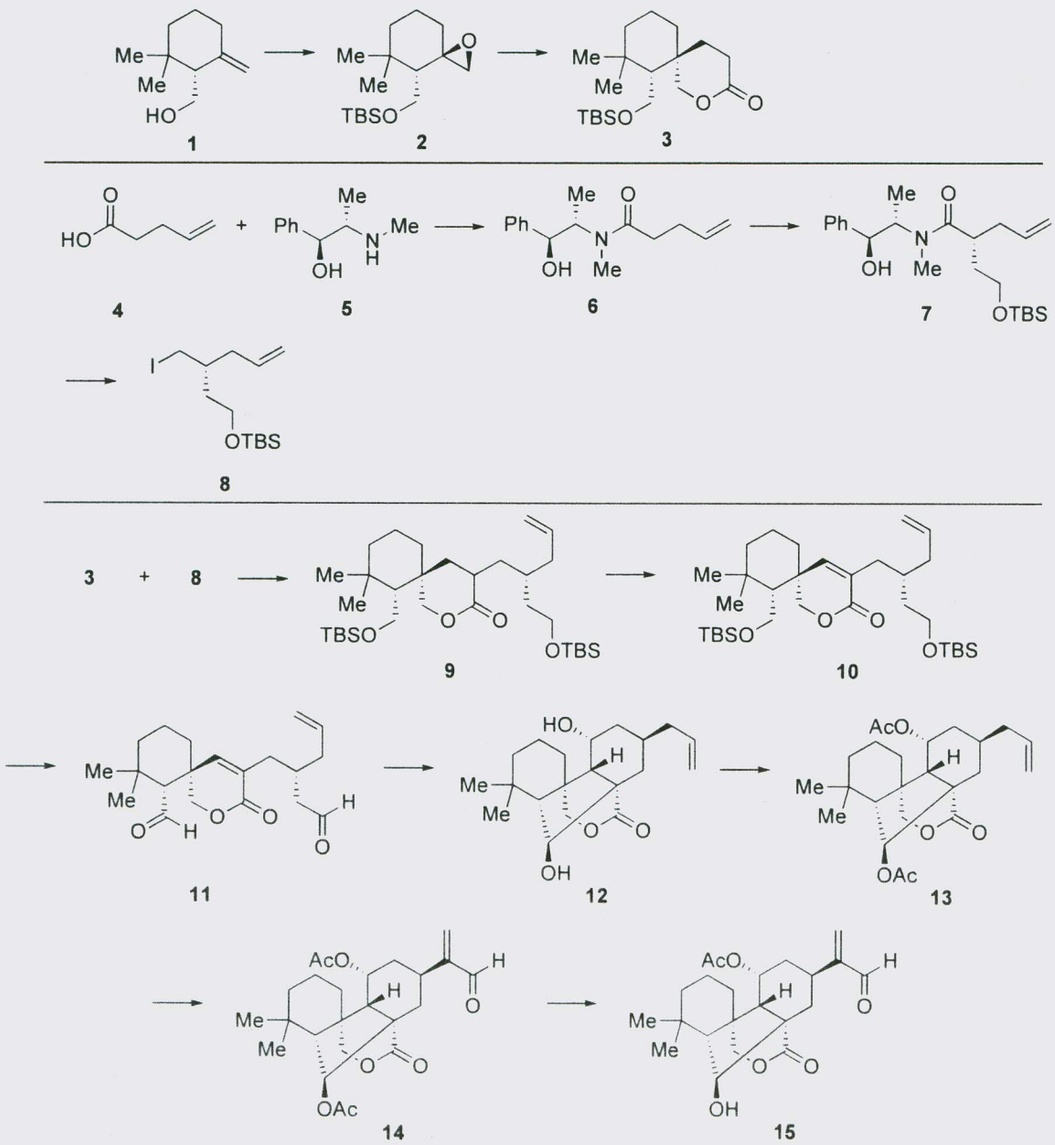
Organic Cume
9-30-2011

1. Provide reagents for each transformation in a recently reported synthesis of (-)-Maoecrystal Z (*J. Am. Chem. Soc.*, **2011**, *133*, 14964-14967.). Please note that more than one chemical step may be involved in some of the transformations and thus multiple reagents may be required for some of the transformations.



2. Draw the 3-D conformation (chair) of compound **3**.
